Author Index

Agarwal, S.K., Spivey, J.J. and Butt, J.B.
Catalyst deactivation during deep oxidation of chlorohydrocarbons 259

Aika, K.-I., see Murata, S. 1

Anderson, S.L., Datye, A.K., Braunschweig, E.J. and Peden, C.H.F.
Reactivity of novel ion-exchanged nickel/hydrous titanate catalysts 185

Bhargava, S.K., see Campbell, I. 13

Bonetto, L., Camblor, M.A., Corma, A. and Perez-Pariente, J.
Optimization of zeolite β in cracking catalysts: Influence of crystallite size 37

Braunschweig, E.J., see Anderson, S.L. 185

Brenner, A., see Halasz, I. 51

Burch, R., Chalker, S., Thomas, J.M., Ueda, W. and Loader, P.
Investigation of ethene selectivity in the methane coupling reaction on chlorine-containing catalysts 77

Butt, J.B., see Hoffmeister, M. 169

Butt, J.B., see Agarwal, S.K. 259

Camblor, M.A., see Bonetto, L. 37

Campbell, I., Saricilar, S., Hoare, I.C. and Bhargava, S.K.
Effect of sulfur on the oxidative coupling of methane over a lanthana catalyst 13

Chalker, S., see Burch, R. 77

Chaqroune, A., see Coq, B. 231

Chattha, M.S., see Haack, L.P. 199

Coq, B., Chaqroune, A., Figueras, F. and Nciri, B.
Alkane conversion and topological segregation in PtM/Al_2O_3 catalysts 231

Corma, A., see Bonetto, L. 37

Datye, A.K., see Anderson, S.L. 185

deVries, J.E., see Haack, L.P. 199

Duprez, D.
Selective steam reforming of aromatic compounds on metal catalysts — a review 111

Figueras, F., see Coq, B. 231

Haack, L.P., deVries, J.E., Otto, K. and Chattha, M.S.
Characterization of lanthanum-modified γ-alumina by X-ray photoelectron spectroscopy and carbon dioxide absorption 199

Halasz, I., Brenner, A., Shelef, M. and Ng, K.Y.S.
Preparation and characterization of $PdO–MoO_3/\gamma$-Al_2O_3 catalysts 51

Hess, A. and Kemnitz, E.
Heterogeneously catalysed dismutation and conmutation reactions of $CHCl_{3-n}F_n$ chlorofluorocarbons: A kinetic study 247

Hoare, I.C., see Campbell, I. 13

Hoffmeister, M. and Butt, J.B.
Selectivities in methylcyclopentane and n-hexane conversion on some metal-loaded SAPO-11 catalysts 169

Jennings, J.R., Owen, G., Nix, R.M. and Lambert, R.M.
Methanol synthesis catalysts derived from copper intermetallic precursors: Transient response to pulses of carbon dioxide, oxygen and nitrous oxide 65

Kemnitz, E., see Hess, A. 247

Kharitonov, A.S., see Panov, G.I. 31

Kiperman, S.L., see Kumbilieva, K. 159

Kumbilieva, K., Sergeeva, T.Yu., Lok, L.K., Petrov, L. and Kiperman, S.L.
Effects of diffusion resistance on some isoprene production processes over decaying catalysts 159

Lambert, R.M., see Jennings, J.R. 65

Lee, F.-M.
Activity of vanadium on different catalyst supports 215

Loader, P., see Burch, R. 77

Lok, L.K., see Kumbilieva, K. 159

Mausbeck, D., see Xu, Xiaoding 91

Murata, S. and Aika, K.-I.
Removal of chlorine ions from Ru/MgO catalysts for ammonia synthesis 1

Nciri, B., see Coq, B. 231

Ng, K.Y.S., see Halasz, I. 51

Nix, R.M., see Jennings, J.R. 65

Otto, K., see Haack, L.P. 199

Owen, G., see Jennings, J.R. 65

Panov, G.I., Sheveleva, G.A., Kharitonov, A.S. and Vostrikova, L.A.
Oxidation of benzene to phenol by nitrous oxide over Fe-ZSM-5 zeolites 31

Peden, C.H.F., see Anderson, S.L. 185

Perez-Pariente, J., see Bonetto, L. 37

Petrov, L., see Kumbilieva, K. 159

Saricilar, S., see Campbell, I. 13

Scholten, J.J.F., see Xu, Xiaoding 91

Scholten, J.J.F., see Struijk, J. 277

Sergeeva, T.Yu., see Kumbilieva, K. 159
Shelef, M., see Halasz, I. 51
Sheveleva, G.A., see Panov, G.I. 31
Spivey, J.J., see Agarwal, S.K. 259
Struijk, J. and Scholten, J.J.F.
Selectivity to cyclohexenes in the liquid phase hydrogenation of benzene and toluene over ruthenium catalysts, as influenced by reaction modifiers 277
Thomas, J.M., see Burch, R. 77
Ueda, W., see Burch, R. 77
Vostrikova, L.A., see Panov, G.I. 31
Xu, Xiaoding, Scholten, J.J.F. and Mausbeck, D.
Stability of copper/cobalt catalysts for the synthesis of higher alcohols from syngas 91

Subject Index

Alkane conversion
Alkane conversion and topological segregation in PtM/Al_2O_3 catalysts 231

γ-Alumina
Heterogeneously catalysed dismutation and conmutation reactions of $CHCl_{3-n}F_n$ chlorofluorocarbons: A kinetic study 247

γ-Alumina
Characterization of lanthanum-modified γ-alumina by X-ray photoelectron spectroscopy and carbon dioxide absorption 199

Ammonia synthesis
Removal of chlorine ions from Ru/MgO catalysts for ammonia synthesis 1

Aromatic compounds
Selective steam reforming of aromatic compounds on metal catalysts – a review 111

Benzene
Selectivity to cyclohexenes in the liquid phase hydrogenation of benzene and toluene over ruthenium catalysts, as influenced by reaction modifiers 277

Benzene oxidation
Oxidation of benzene to phenol by nitrous oxide over Fe-ZSM-5 zeolites 31

Bimetallics
Alkane conversion and topological segregation in PtM/Al_2O_3 catalysts 231

Binary alloys
Methanol synthesis catalysts derived from copper intermetallic precursors: Transient response to pulses of carbon dioxide, oxygen and nitrous oxide 65

Carbon dioxide
Methanol synthesis catalysts derived from copper intermetallic precursors: Transient response to pulses of carbon dioxide, oxygen and nitrous oxide 65

Carbon dioxide absorption
Characterization of lanthanum-modified γ-alumina by X-ray photoelectron spectroscopy and carbon dioxide absorption 199

Catalyst characterization (hydrogen chemisorption, TEM, XPS)
Removal of chlorine ions from Ru/MgO catalysts for ammonia synthesis 1

Catalyst characterization (TPR, XRD)
Preparation and characterization of $PdO–MoO_3/\gamma$-Al_2O_3 catalysts 51

Catalyst characterization (XPS, XRD)
Characterization of lanthanum-modified γ-alumina by X-ray photoelectron spectroscopy and carbon dioxide absorption 199

Catalyst preparation ((co-)adsorption)
Preparation and characterization of $PdO–MoO_3/\gamma$-Al_2O_3 catalysts 51

Catalyst preparation (impregnation)
Characterization of lanthanum-modified γ-alumina by X-ray photoelectron spectroscopy and carbon dioxide absorption 199

Catalyst preparation (ion exchange, wet impregnation)
Selectivities in methylcyclopentane and n-hexane conversion on some metal-loaded SAPO-11 catalysts 169

Catalyst preparation (wet impregnation)
Removal of chlorine ions from Ru/MgO catalysts for ammonia synthesis 1

Catalyst stability
Stability of copper/cobalt catalysts for the synthesis of higher alcohols from syngas 91

Catalytic cracking (gas-oli)
Optimization of zeolite β in cracking catalysts: Influence of crystallite size 37

Chlorine
Removal of chlorine ions from Ru/MgO catalysts for ammonia synthesis 1

Chlorine promoters
Investigation of ethene selectivity in the methane coupling reaction on chlorine-containing catalysts 77

Chlorofluorocarbon
Heterogeneously catalysed dismutation and conmutation reactions of $CHCl_{3-n}F_n$ chlorofluorocarbons: A kinetic study 247

Chlorohydrocarbons
Catalyst deactivation during deep oxidation of chlorohydrocarbons 259

Chromia/alumina
Catalyst deactivation during deep oxidation of chlorohydrocarbons 259

Cobalt
Stability of copper/cobalt catalysts for the synthesis of higher alcohols from syngas 91
Conmutation
Heterogeneously catalysed dismutation and conmutation reactions of $CHCl_{3-n}F_n$ chlorofluorocarbons: A kinetic study 247
Copper
Stability of copper/cobalt catalysts for the synthesis of higher alcohols from syngas 91
Copper/rare earth
Methanol synthesis catalysts derived from copper intermetallic precursors: Transient response to pulses of carbon dioxide, oxygen and nitrous oxide 65
Cracking
Selectivities in methylcyclopentane and n-hexane conversion on some metal-loaded SAPO-11 catalysts 169
Cracking mechanism
Activity of vanadium on different catalyst supports 215
Deactivation
Effects of diffusion resistance on some isoprene production processes over decaying catalysts 159
Deactivation
Catalyst deactivation during deep oxidation of chlorohydrocarbons 259
Deep oxidation
Catalyst deactivation during deep oxidation of chlorohydrocarbons 259
Dismutation
Heterogeneously catalysed dismutation and conmutation reactions of $CHCl_{3-n}F_n$ chlorofluorocarbons: A kinetic study 247
Disproportionation
Heterogeneously catalysed dismutation and conmutation reactions of $CHCl_{3-n}F_n$ chlorofluorocarbons: A kinetic study 247
FCC alkene production
Optimization of zeolite β in cracking catalysts: Influence of crystallite size 37
FCC catalysts
Optimization of zeolite β in cracking catalysts: Influence of crystallite size 37
Fe-ZSM-5 zeolites
Oxidation of benzene to phenol by nitrous oxide over Fe-ZSM-5 zeolites 31
Fluidized bed
Catalyst deactivation during deep oxidation of chlorohydrocarbons 259
Gasoline
Optimization of zeolite β in cracking catalysts: Influence of crystallite size 37
Group VIII metal catalysts
Selective steam reforming of aromatic compounds on metal catalysts – a review 111
n-Hexane
Selectivities in methylcyclopentane and n-hexane conversion on some metal-loaded SAPO-11 catalysts 169
Higher alcohol synthesis
Stability of copper/cobalt catalysts for the synthesis of higher alcohols from syngas 91
Hydrogen bond
Selectivity to cyclohexenes in the liquid phase hydrogenation of benzene and toluene over ruthenium catalysts, as influenced by reaction modifiers 277
Hydrogenation
Selectivity to cyclohexenes in the liquid phase hydrogenation of benzene and toluene over ruthenium catalysts, as influenced by reaction modifiers 277
Hydrogenolysis
Selectivities in methylcyclopentane and n-hexane conversion on some metal-loaded SAPO-11 catalysts 169
Hydrogenolysis
Alkane conversion and topological segregation in PtM/Al_2O_3 catalysts 231
Hydrous metal oxides
Reactivity of novel ion-exchanged nickel/hydrous titanate catalysts 185
Intraparticle diffusion
Effects of diffusion resistance on some isoprene production processes over decaying catalysts 159
Isoprene production
Effects of diffusion resistance on some isoprene production processes over decaying catalysts 159
Kinetic mechanism
Heterogeneously catalysed dismutation and conmutation reactions of $CHCl_{3-n}F_n$ chlorofluorocarbons: A kinetic study 247

Kinetics
Effects of diffusion resistance on some isoprene production processes over decaying catalysts 159
Lanthanum oxide
Effect of sulfur on the oxidative coupling of methane over a lanthana catalyst 13
Lanthanum oxysulphate
Effect of sulfur on the oxidative coupling of methane over a lanthana catalyst 13
Lanthanum/alumina
Characterization of lanthanum-modified γ-alumina by X-ray photoelectron spectroscopy and carbon dioxide absorption 199
Liquid phase
Selectivity to cyclohexenes in the liquid phase hydrogenation of benzene and toluene over ruthenium catalysts, as influenced by reaction modifiers 277
Mechanism
Activity of vanadium on different catalyst supports 215
Methane activation
Investigation of ethene selectivity in the methane coupling reaction on chlorine-containing catalysts 77
Methane oxidative coupling
Effect of sulfur on the oxidative coupling of methane over a lanthana catalyst 13
Methanol synthesis
Methanol synthesis catalysts derived from copper intermetallic precursors: Transient response to pulses of carbon dioxide, oxygen and nitrous oxide 65
Methylcyclohexene
Selectivity to cyclohexenes in the liquid phase hydrogenation of benzene and toluene over ruthenium catalysts, as influenced by reaction modifiers 277
Methylcyclopentane
Selectivities in methylcyclopentane and n-hexane conversion on some metal-loaded SAPO-11 catalysts 169
Modifier
Selectivity to cyclohexenes in the liquid phase hydrogenation of benzene and toluene over ruthenium catalysts, as influenced by reaction modifiers 277
Molybdenum/alumina
Preparation and characterization of PdO–MoO_3/γ-Al_2O_3 catalysts 51
Nickel
Reactivity of novel ion-exchanged nickel/hydrous titanate catalysts 185
Nitrous oxide
Oxidation of benzene to phenol by nitrous oxide over Fe-ZSM-5 zeolites 31
Nitrous oxide
Methanol synthesis catalysts derived from copper intermetallic precursors: Transient response to pulses of carbon dioxide, oxygen and nitrous oxide 65
NOX
Preparation and characterization of PdO–MoO_3/γ-Al_2O_3 catalysts 51
Oxygen
Methanol synthesis catalysts derived from copper intermetallic precursors: Transient response to pulses of carbon dioxide, oxygen and nitrous oxide 65
Palladium
Selectivities in methylcyclopentane and n-hexane conversion on some metal-loaded SAPO-11 catalysts 169
Palladium/alumina
Preparation and characterization of PdO–MoO_3/γ-Al_2O_3 catalysts 51
Phenol synthesis
Oxidation of benzene to phenol by nitrous oxide over Fe-ZSM-5 zeolites 31
Platinum
Selectivities in methylcyclopentane and n-hexane conversion on some metal-loaded SAPO-11 catalysts 169
Platinum
Alkane conversion and topological segregation in PtM/Al_2O_3 catalysts 231
Platinum
Selective steam reforming of aromatic compounds on metal catalysts – a review 111
Potassium
Removal of chlorine ions from Ru/MgO catalysts for ammonia synthesis 1
Rhodium
Selective steam reforming of aromatic compounds on metal catalysts – a review 111

Ruthenium
Removal of chlorine ions from Ru/MgO catalysts for ammonia synthesis 1
Ruthenium
Selectivity to cyclohexenes in the liquid phase hydrogenation of benzene and toluene over ruthenium catalysts, as influenced by reaction modifiers 277
SAPO-11
Selectivities in methylcyclopentane and n-hexane conversion on some metal-loaded SAPO-11 catalysts 169
Selectivity (benzene, iso-hexane)
Selectivities in methylcyclopentane and n-hexane conversion on some metal-loaded SAPO-11 catalysts 169
Selectivity (ethene)
Investigation of ethene selectivity in the methane coupling reaction on chlorine-containing catalysts 77
Selectivity (methylcyclohexene)
Selectivity to cyclohexenes in the liquid phase hydrogenation of benzene and toluene over ruthenium catalysts, as influenced by reaction modifiers 277
Steam reforming
Selective steam reforming of aromatic compounds on metal catalysts – a review 111
Sulphur poisoning
Effect of sulfur on the oxidative coupling of methane over a lanthana catalyst 13
Support effects
Activity of vanadium on different catalyst supports 215
Surface topology
Alkane conversion and topological segregation in PtM/Al_2O_3 catalysts 231
Syngas
Stability of copper/cobalt catalysts for the synthesis of higher alcohols from syngas 91
Syngas conversion
Methanol synthesis catalysts derived from copper intermetallic precursors: Transient response to pulses of carbon dioxide, oxygen and nitrous oxide 65
Temperature-programmed reduction
Preparation and characterization of $PdO–MoO_3/\gamma\text{-}Al_2O_3$ catalysts 51
Ternary alloys
Methanol synthesis catalysts derived from copper intermetallic precursors: Transient response to pulses of carbon dioxide, oxygen and nitrous oxide 65
Titanates
Reactivity of novel ion-exchanged nickel/hydrous titanate catalysts 185
Toluene
Selectivity to cyclohexenes in the liquid phase hydrogenation of benzene and toluene over ruthenium catalysts, as influenced by reaction modifiers 277
Transient response
Methanol synthesis catalysts derived from copper intermetallic precursors: Transient response to pulses of carbon dioxide, oxygen and nitrous oxide 65
Transmission electron microscopy
Reactivity of novel ion-exchanged nickel/hydrous titanate catalysts 185
Vanadium effects
Activity of vanadium on different catalyst supports 215
Volatile organic compounds
Catalyst deactivation during deep oxidation of chlorohydrocarbons 259
Zeolites
Optimization of zeolite β in cracking catalysts: Influence of crystallite size 37
Zeolites
Oxidation of benzene to phenol by nitrous oxide over Fe-ZSM-5 zeolites 31
